

## 12. Googlesearch

Friday, October 9, 2020 6:47 PM

```
1 import os, time, random
2 try:
3     from googlesearch import search
4 except ImportError:
5     os.system('pip install google')
6     print('Installing google... Ejecute de nuevo')
7     exit()
8
9 # to search
10 query = input("Búsqueda: ")
11 print("Buscando...")
12 time.sleep(2)
13 for enlace in search(query, tld="com", num=15, stop=15, pause=5):
14     print(selec, enlace)
```
